

The only way to truly get a budget under control is to spend no more than you take in. I am in support of this badly needed bill to implement the state spending cap and get spending and size of state government under control. Our economy is mired in too many taxes, fees, and regulations. We also spend too much on borrowed monies and this would help start to bring our debts down. We need to turn this state around and do things differently! Spending more than we have only hurts in the short and long term.
